DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-20, drawn to a method of removing a conductive edge bead (claims 1-18) and an integrated circuit formed thereby (product-by-process claims 19-20), classified in class 438, subclass 694.
 - II. Claims 21-32, drawn to an apparatus for performing edge bead removal, classified in class 156, subclass 345.1+.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process, such as by spraying the etchant from the “contoured surface” to contact the workpiece.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2813

5. This application contains claims directed to the following patentably distinct species:

In addition to electing the method or apparatus, **one** from each of the lettered groups A through B below must be elected to form a single species combination for the associated devices and the methods of using the devices:

A. The device and method associated with the devices:

A-1. Figs. 3A, 4A

A-2. Fig. 4B

A-3. Fig. 4C

A-4. Figs. 4D-4E

A-5. Fig. 6

A-6. Fig. 7

Should Applicant elect **A-1**, then one of the following must also be elected: (See instant specification paragraph [0035].)

A-1a. etchant cavity width **wider** than thickness of workpiece

A-1b. etchant cavity width **narrower** than thickness of workpiece

Should Applicant elect A-4, then one of the following must also be elected:

A-4a. V-shaped openings of **Fig. 4Da**

A-4b. V-shaped openings of **Fig. 4Db**

B. The positioning of the workpiece (See specification at paragraphs [0037]-[0039].)

B-2. Fig. 3D

Art Unit: 2813

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is considered generic to Group I and claim 21 is considered generic to Group II.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and **a listing of all claims readable thereon, including any claims subsequently added**. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2813

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erik Kielin whose telephone number is 571-272-1693. The examiner can normally be reached from 9:00 - 19:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Whitehead, Jr. can be reached on 571-272-1702. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
